PEOPLE'S BIODIVERSITY REGISTER HRIANGHMUN

Compiled by
Members of Biodiversity Management Committee, Hrianghmun &

Mizoram State Biodiversity Board
Office of Chief Wildlife Warden
Environment, Forest & Climate Change Department
MINECO, Khatla, Aizawl
Mizoram

PART-I

1. The Biological Diversity Act, 2002 & Rules, 2004

The Biological Diversity Act, 2002 (No. 18 of 2003) was notified by the Government of India on 5th February, 2003. The Act extends to the whole of India and reaffirms the sovereign rights of the country over its biological resources. Subsequently the Government of India published Biological Diversity Rules, 2004 (15th April, 2004). The Rules under section 22 states that 'every local body shall constitute a Biodiversity Management Committee (BMC) within its area of jurisdiction'.

2. People's Biodiversity Registers and role of the Biodiversity Management Committee

The mandate of the Biodiversity Management Committee has been clearly highlighted in the Biological Diversity Rules 2002 as follows:

- The main function of the BMC is to prepare People's Biodiversity Register in consultation with the local people. The register shall contain comprehensive information on availability and knowledge of local biological resources, their medicinal or any other use.
- > The other functions of the BMC are to advice on any matter referred to it by the State Biodiversity Board or Authority for granting approval, to maintain data about local vaids and practitioners using the biological resources.
- > The Authority shall take steps to specify the form of People's Biodiversity Registers, and the particulars it shall contain and the format for electronic database.
- > The Authority and the State Biodiversity Boards shall provide guidance and technical support to the Biodiversity Management Committees for preparing People's Biodiversity Register.
- > The People's Biodiversity Registers shall be maintained and validated by the Biodiversity Management Committees.

3. People's Biodiversity Registers and role of National Biodiversity Authority (NBA)

The National Biodiversity Authority shall provide guidance and technical support to the Biodiversity Management Committee (BMC) for preparing People's Biodiversity Register.

People's Biodiversity Registers and the role of State Biodiversity Board (SBB)

The State Biodiversity Board (SBB) would provide necessary training to the technical Support Group (TSG) of the district and enable smooth functioning and aid in networking for creation and maintenance of People's Biodiversity Registers (PBR).

People's Biodiversity Registers and Role of the Technical Support Group (TSG)

The Technical Support Group (TSG) will consist of experts from various disciplines and line departments, universities, research institutes, colleges and schools and non-governmental organizations. The Technical Support Group will provide technical inputs and advice to the BMC's on identification of plants and animals, monitor and evaluate the PBR exercise, examine confidential information and advice on legal protection, maintain a database of local and external experts on biodiversity.

4. People's Biodiversity Registers (PBR)

Being a mega biodiverse country, India is very rich in biological and cultural diversity. It is also a home of many tribal groups, pursuing different kinds of nature based livelihoods. In addition, a large number of farming, fishing communities, and nomadic group possessed traditional knowledge of varying degrees. The development of modern science and technology in biotechnology and information technologies have increased the value of biodiversity and associated knowledge including traditional knowledge (TK). The growing importance of biodiversity, bio-resources and associated knowledge is fairly well understood. The first step towards conservation is sustainable utilization of biodiversity and its documentation. Biodiversity and associated knowledge is found in different ecosystems under different legal management regimes and hence the results and the manner of documentation will also differ.

The present manual guidelines have been drafted taking into consideration different ecosystems and include the rural, urban and protected areas. The guidelines may be customized and further information may be added to enrich the effort. It is important to keep in mind some of the issues related to PBRs:

- > It is to be undertaken in a participatory mode involving varying sections of village society
- ➤ While documenting the PBR, knowledge and views of both genders are to be recorded
- Information's provided by the community should be collated, analyzed and crosschecked by the members of the Technical Support group (TSG) before documentation
- > PBR is important base document in the legal arena as evidence of prior knowledge and hence careful documentation is necessary
- The document should be endorsed by the BMC and later publicized in the Gram Sabha/Grma Panchayat/Panchayat Samiti. The document can be a very useful tool in the management and sustainable use of bio-resources. The document can also be a very useful teaching tool for teaching environmental studies at schools, colleges and university level.
- The document should be periodically updated with the additional and new information as and when generated.

4.1 The PBR Process

The preparation of People's Biodiversity registers (PBR) involves the active support and cooperation of a large number of people who need to share their common as well as knowledge (traditional knowledge). The first and foremost important task for preparing a PBR is organizing a group meeting to explain the objectives and purpose of the exercise. Different social groups in the village need to be identified for purpose of data collection from those groups. In an urban situation, spots where biodiversity are important need to be identified for the purpose of the study and documentation. The documentation process includes information gathered from individuals through detailed questionnaire; focused group discussion with person's having knowledge and published secondary information.

4.2 Documentation and Traditional Knowledge (TK) related to biodiversity

Documentation of knowledge of individuals with regard to biodiversity and its uses is an important part of PBR. Every effort should be made to identify the persons with proven knowledge of local biodiversity; special attention should be given to the elderly persons who can also provide information on the biodiversity which was available in the past but no longer seen at present. In some cases focus group discussion may be held for the purpose of documentation.

4.3 PBR Methodology

The PBR is a participatory process requiring intensive and extensive consultation with the people. The objectives and purpose is to be explained in a group meeting in the presence of all sections of people in the Panchayat, members of the BMC, students, knowledgeable individuals and those interested in the effort. Documentation includes photographs (including digital images), drawings, audio and video recordings and other records like printed material.

4.4 Process in PBR Preparation

Step I: Formation of Biodiversity Management Committee (BMC)

Step II : Sensitization of the community/local people about the study, survey and possible management

Step III: Training of members in identification and collection of data on biological resources and traditional knowledge

Step IV : Collection of data. Data collections includes review of literature on the natural resources of the districts, Participatory Rural Appraisal

(PRAs) at village level, household interviews, individual interviews with village leaders and knowledgeable individuals, household heads,

key actors of the panchayat raj institutions and NGOs and direct field observations

Step V : Analysis and validation of data in consultation with technical support group and BMC

Step VI: Preparation of People's Biodiversity Register (PBR)

Step VII : Computerization of information and resources.

General Details of People's Biodiversity Register (PBR) of HRIANGHMUN

Name of the village : Hrianghmun

Block : Ngopa RD Block

District : Saitual

State : Mizoram

Geographical Area of the Panchayat Samity : 10 sq.km

Population under the Panchayat Samity : 709

Male : 360

Female : 349

Habitat and Topography : Tropical evergreen forest, Hilly terrain & Plain

3°C-33°C (Temp.), 4000mm(Rainfall)

Climate (Rainfall, Temperature and other

weather patterns)

Land use (Nine fold classification available

with village records) : Agriculture/Farming

Date, Month and Year of PBR preparation : 24.03.2022

Management Regime: Reserve Forests (RF)/

Joint Management (JM)/Protected areas (PA)/ COM
Community Owned and Managed Forests (COM)

Annexure I

Details of the BMC members of the Panchayat (One elected chairperson and six persons nominated by the local body; not less than one third to be women and not less than 18% belonging to SC/ST)

1. Name of the Chairman : Khenzakhupa 2. Name : Thawngzakhupa

Age:57Age:52Gender:MaleGender:Male

Address : Hrianghmun Address : Hrianghmun Area of specialization : Farmer Area of specialization : Farmer

3. Name : Ginpiangsanga 4. Name : El Paula

Age:51Age:44Gender:MaleGender:Male

Address : Hrianghmun Address : Hrianghmun Area of specialization : Farmer Area of specialization : Farmer

5. Name : Pauchinthanga 6. Name : Manlamchingi

Age : 42 Age : 48 Gender : Male Gender : Female

Address : Hrianghmun Address : Hrianghmun

Area of specialization : Farmer Area of specialization : Farmer

7. Name : Chinglianzami

Age : 40

Gender : Female

Address : Hrianghmun

Area of specialization : Farmer

Annexure II

List of Vaids, hakims and traditional healthcare (human and livestock) practitioners residing and or using biological resources occurring within the jurisdiction of the village.

Name : NIL

Age : Gender : Address : Area of specialization :

Location from which the person accesses biological material :

Perception of the practitioner

on the resource status :

Annexure III

List of individuals perceived by the villagers to possess Traditional knowledge (TK) related to biodiversity in agriculture, fisheries and forestry.

Name : NIL

Age : Gender : Address : Area of Specialization :

Annexure IV

Details of schools, colleges, departments, universities, government institutions, non-governmental organization and individuals involved in the preparation of the PBR

1) Contact Person : Dr. Lalneihpuia Chhakchhuak

Name and Address : Technical Assistant

Mizoram State Biodiversity Board

2) Contact Person : Derrick Zothanmawia Name and Address : Computer Assistant

Mizoram State Biodiversity Board

Rhizome is used as condiment	Mar-April	Edible	Juice of rhizome is used for stomach ulcer, jaundice, doarrhoea, dysentery, cholera, asthma, food poisoning, and also used as a tonic for blood purifier	1	Local	Mizo
Leaves and stems as vegetable	Mar-April	Edible	Flowers are chewed to relieve toothache and affections of the gum and throat	-	Local	Mizo
Young leaves are eaten as vegetables	Mar-April	Edible	Seeds and oil are used in medicine	ı	Local	Mizo
Leaves are eaten as vegetables, curry	Mar-April	Edible	Leaves are used as diuretic, sedative, refrigerant	-	Local	Mizo
Leaves used as flavouring dishes	Mar-April	Edible	Leaves are used for expulsion of threadworms from the body, as a remedy for food poisoning. Roots and leaves are boiled and the water is drunk for malarial fever, diabetes, pneumonia, and constipation	-	Local	Mizo
Spadix is eaten cooked as vegetable	Mar-April	Edible	-	-	Local	Mizo
Corm, stem and young leaves are eaten as vegetables	Mar-April	Edible	Acrid juice is applied to wounds and bee sting. Whole plant is used for pig feed	-	Local	Mizo
Unripe fruit as vegetable	Mar-April	Edible	Root, leaves, fruits and seeds are used as medicine	-	Local	Mizo
Unripe fruit eaten as vegetable	Mar-April	Edible	Cut fruit soaked in water overnight (water) is used to control diabetes	-	Local	Mizo
Green immature pods are cooked and eaten as vegetables	Mar-April	Edible	Beans are also used for diarrhoea, dysentery, burns, diabetes, rheumatism, sciatica etc	-	Local	Mizo
Young leaves, pods and seeds as vegetable	Mar-April	Edible	Seed is useful to strengthen stomach and kills worm in the stomach	-	Local	Mizo
Tender leaves, pods as vegetable, yellow seeds as pulse	Mar-April	Edible	Leaves and seeds are medicinal, leaves as cattle fodder	-	Local	Mizo
Seeds are edible rich in protein, oils and minerals	August	Edible	Seeds are cooked, fermented and eaten as delicacies (called <i>Bekang</i> famous –traditional Mizo dish). Boiled water of seeds are given to pigs for fertility control	-	Local	Mizo
Young pods, seeds as vegetable	Mar-April	Edible	Juice of crushed leaves is used against diarrhoea, stomach-ache	-	Local	Mizo
Fruit and young leaves as vegetable	Mar-April	Edible	Fruits and leaves are considered antidote for snake bite	-	Local	Mizo
Seeds are eaten cooked as vegetable	July	Edible	-	-	Local	Mizo
Grain is the staple food	April	Edible	Chipstraw is boiled and the water is used for kidney stone and urinary problems. Rice wash water is also used for diarrhoea, dysentery	-	Local	Mizo
Young fruit and leaves are cooked or fried eaten as vegetable	Mar-April	Edible	Leaves and fruits are medicinal used to treat fever, jaundice, diabetes, dysentery, intestinal worms etc	-	Local	Mizo
-	Mar-April	Edible	Baked grains are pounded and eaten as curry	-	Local	Mizo
Fruit is edible	Mar-April	Edible	Juice of the leaves and stem are used in high blood pressure. Fruits and seeds are also medicinal	-	Local	Mizo
Fruits are condiment and leaves as vegetable	Mar-April	Edible	Juice of the fruits is applied to burns, snake bite and centipede sting	-	Local	Mizo

Fruits are condiment and leaves as vegetable	Mar-April	Edible	Juice of the fruits is applied to burns, snake bite and centipede sting	-	Local	Mizo
Rhizome is cooked and eaten	Mar-April	Edible	Rhizome is used as curry and in medicine	-	Local	Mizo
Fruits, young shoot and roots are eaten as vegetable-	Mar-April	Edible	Leaves are used for fodder	-	Local	Mizo
Leaves are eaten as vegetables, curry	Mar-April	Edible	Leaves are used as diuretic, sedative, refrigerant	-	Local	Mizo
Leaves and flowers -are used for flavouring curry-	Mar-April	Edible	-	-	Local	Mizo
Flowers, fruit, you-ng leaves and stem are all eaten as v-egetables	Mar-April	Edible	Seeds are used to expel worms from the body	-	Local	Mizo
Fruits and tender leaves are eaten as vegetable	Mar-April	Edible	Juice of the fruit is a cure for cholera, diarrhoea, dysentery, fever, asthma, vomiting and kidney diseases. Infusion of leaves and fruit are used externally in snake bite	-	Local	Mizo
Fruit is cooked and eaten as vegetable	Mar-April	Edible	-	-	Local	Mizo
Leaves and flowers are eaten cooked as vegetable	Mar-April	Edible	Leaves are cooked with water and water is taken for hypertension, blood sugar etc	-	Local	Mizo
Leaves and flowers are used as condiment	Mar-April	Edible	-	-	Local	Mizo
Green- fruit are eaten as vegetable	Mar-April	Edible	Fruit is good for high blood pressure, skin problems and anti microbial	-	Local	Mizo
Rhizomes are used as spice and condiment, taken as cure for food poisoning	Mar-April	Edible	Tender leaves, young flowers are eaten cooked as vegetable, juice of the pounded rhizomes is given to women in case of insufficient supply of milk for their babies and also dropped into the ear when attacked by ticks.	-	Local	Mizo
-	Mar-April	Edible	Corm and young leaf stalk and shoots are eaten cooked as veg.	-	Local	Mizo
Fruit is edible	Mar-April	Edible	-	-	Local	Mizo
-	Mar-April	Edible	Leaves are pounded, dried and used for making cigarette	-	Local	Mizo
Grains are eate-n cooked, roasted, fried-	Mar-April	Edible	Grains and leaves are used to feed poultry, pigs and cows. Decoction of the grain is used as hip bath for piles, lessen pain	-	Local	Mizo
-	June	Edible	Leaves and head are eaten cooked as vegetable	-	Local	Mizo
Fresh bulb and leaves as condiment	Mar-April	Edible	Bulbs are used for treating fever, hypertension, indigestion, pneumonia, common cold etc. Juice of bulb is applied to muscle sprains, earache etc	-	Local	Mizo

Management Mechanism	Associated TK	Other Details	Community/
			Knowledge holder
	-	-	Mizo
Mostly, the local communities do not used insecticides or pesticides to control pest attacking crops. They	-	-	Mizo
do not follow any specific mechanisms to manage these pests. Recent outbreak of fall armyworm	-	-	Mizo
attacking maize in the jhum fields have caused a serious damage to the crops and some farmers used	-	-	Mizo
insecticides like Emamectin benzoate 5% SG to control such pests . Bangla Red Soap (Bangla Sahbawn	-	-	Mizo
sen) is diluted with water and is sprayed or dropped to the worms or crop affected by fall army worm.	-	-	Mizo

Season of Fruiting	Uses (Usage)	Associated TK	Other details	Community/ Knowledge Holder
Apr – Jun	Fruit is edible. Wood is used for furniture, gunstock etc	-	Own/Market use	Mizo
May-Jul	Fruit is edible	Fruit is laxative and refrigerant	Own/Market use	Mizo
Sept-Nov	Bark & young leaves are used against diarrhoea, dysentery. Richest natural source of vitamin C	Juice of pounded bark, leaves & ripe fruits are applied to carbuncle. Bark paste is applied to toothache.	Own/Market use	Mizo
April - June			Own/Market use	Mizo
Dec-Jan	Decoction of fruit used for colic, diarrhoea, dysentery	Wood used for fence posts & gun powder	Own/Market use	Mizo
Jun-Aug	Decoction of root used in fever, asthma, leaves used in fever, skin diseases, wounds, boils etc	Young fruits and seeds used as vegetable	Own/Market use	Mizo
June-Aug	Bark is used for constipatioan and leaves for toothache	-	Own/Market use	Mizo
Apr-May	Fruits are eatable	-	Own/Market use	Mizo
Nov- Jan	Wood used for planking, ceilings, pencils, match boxes, plyboard, building purposes, fence post etc	-	Own/Market use	Mizo
Jun-Sep	Fruits edible, rich source of vitamin C	Roots are used in colic, vomiting etc	Own/Market use	Mizo
Nov-Mar	Fruit is medicinal	Seeds are used for hypertension and diabetes	Own/Market use	Mizo
Oct-Feb	Fruit is a rich source of vitamin C, eaten by man	Water of boiled leaves used for bathing in fever	Own/Market use	Mizo
Whole year	Fruit which is very rich in vitamin C.	Bark is used for poisoning fish. Juice of the crushed bark is used for lung diseases, tarantula bite, dysentery and diarrhoea. Bark is boiled and water is used for washing rash or sores. Pounded fruits are soaked in water and are taken for expelling the retained placenta. Fruits are boiled in water and drunk for diabetes.	Own/Market use	Mizo
Frb – April	Wood used for furniture, tool handles, rice pounders, firewood, charcoal etc. young leaves and pods are used as vegetable	Seeds are considered antidote for snake bites. Fruit and juice of leaves are used for fever, jaundice ulcers and itching etc	Own/Market use	Mizo
May-Aug	Wood is used fir furniture, boat building, planking, tea boxes, pcking cases etc. Fruits is eadible and used for making pickles.	Decoction of young leaves used in diabetes, diarrhoea, ash of dried leaves is also taken to stop hiccough.	Own/Market use	Mizo
Dec – Mar	Fruit is edible. Leaves are lopped for cattle fodder	Bark and leaves are used in septic poisoning and itch.	Own/Market use	Mizo
May-July	Fruit is edible, wood is used for firewood.	-	Own/Market use	Mizo
Oct – Dec	Fruit is edible and leaves are lopped for cattle fodder	-	Own/Market use	Mizo

Whole year	Ripe fruit is good for digestion.	Decoction of unripe fruit is used to cure jaundice,	Own/Market use	Mizo
		diabetes etc. juice of boiled leaves is used to treat various		
		type of cancer and stomach problems		
Aug-Sept	Fruits are edible	-	Own/Market use	Mizo
Aug - Oct	Bark is used for making rope	Acid leaves are used in snake bites. Juice of crushed	Own/Market use	Mizo
		leaves are also used for whooping cough.		
Nov-Feb	Unmatured pods and tender leaves are eaten as vegetable.	Young leaves and seeds are useful against food allergy,	Own/Market use	Mizo
		colic, diarrhoea and dysentery. Bark and fruits are		
		prescribed to check excessive bleeding during		
		menstruation. Juice of the green rind of the pod is applied		
		to fresh cuts, scabiea and itching.

Roots, bark, leaves	Decoction of root & bark is used in fevers, colic, stomach ulcer, indigestion, dysentery, diarrhoea etc. Poultice of the bark is applied to rheumatism, sprains, imflammations and skin diseases. Decoction of leaves is used in flatulence, ulcers, etc. decoction of fruit is used to treat diseases of liver, hepatitis etc	-	Mizo
Spadix, stem	Juice of the plant is used externally for snake bite. Leaf is also used for catching land leech from the body	=	Mizo
Leaves	-	=	Mizo
Stem, Buds, leaves	Juice of stem is used for snake bites, diarrhoea, dysentery and pounded seeds for diabetes	-	Mizo
Leaves, fruit	Young leaves are eaten as vegetable, but several changes of water is needed while cooking. Decoction of fruit is used against stomach-ache, dysentery	-	Mizo
Seeds	-	-	Mizo
Leaves, buds	Leaves are used for feasts instead of rice plates. Stems are used for pig feed. Leaves are also used for cattle fodder	-	Mizo
Seed, leaves	Seed is used to treat diabetes, and bark for fever, jaundice, urinary problems etc. Tassar silkworm feed on its leaves	-	Mizo
Whole plant	Roots and leaves are used to treat stomachache, leaves are also used as fodder	-	Mizo
Leaf, flowers, spadix	Juice of stem is used in severe fever and giddiness of children.	-	Mizo
Leaves	-	-	Mizo
Fruit, shoots, leaves	Decoction of leaves is given to women after birth	-	Mizo
Leaves, flowers, fruit and seeds	Fibres of inner bark are good for nets and ropes	-	Mizo
Leaves, Flowers	Decoction of leaves is used to reduce high blood pressure and decrease breast feeding mother's breast milk, also	-	Mizo

	used to heal acute mastities		
Leaves, fruit	Ripe fruit is useful for jaundice and liver problems	-	Mizo
Leaves	Wood is used for firewood and charcoal	=	Mizo
Fruit	fruit is medicinal used to treat hypertension and diabetes	-	Mizo
Corm, young leaf,	The corm with Ching-al (Lye) is boiled to remove irritants. So, the boiled corm is mixed with Sa-um (fermented	-	Mizo
shoot	pork fat), Ching-al (Lye) and Salt and then eaten as curry (Traditional Mizo Dish)		
Leaves		=	Mizo
Shoot, leaves	It is used for making baskets, mats, furniture, chairs etc and fruit is edible	=	Mizo
Fruit, leaves	Leaves are eaten cooked as vegetable and also used for pig's feed	=	Mizo
Whole plant	Fibre is made into ropes, brushes, brooms, basket etc. terminal bud is eaten cooked as vegetable	=	Mizo
Bud, stem, leaves	Leaves are used for feasts instead of rice plates. Stems are used for pig feed. Leaves are also used for cattle fodder	-	Mizo
Whole plant	Whole plant is used in medicine, used for treating cancer etc	-	Mizo

Local Name	Scientific Name	Habitat	Local Status		Other uses
			Past	Present	(if any)
Batling	Wedlandia bundleioides	Wild	Insufficient	Insufficient	Wood is used for gunpowder, charcoal, firewood etc
Bul	Alseodaphne petiolaris	Wild	Insufficient	Insufficient	Wood is used for building, furniture, firewood etc
Bung	Ficus benghalensis	Wild	Insufficient	Insufficient	Wood used for fuelwood, well curbs etc
Char	Terminalia myriocarpa	Wild	Abundant	Abundant	Wood used for furniture, house building, firewood etc
Fah	Lithocarpus dealbatus	Wild	Abundant	Abundant	Wood used for rice pestle, firewood and charcoal etc
Fartuah	Erythrina variegata	Wild	Abundant	Abundant	Wood is used for drums, toys etc and bark fibre for cordage
Hmawng	Ficus sp	Wild	Abundant	Abundant	Wood used for fuel and charcoal etc
Hmuifarial	Syzygium claviflorum	Wild	Insufficient	Insufficient	Wood is used for firewood, leaves are lopped for cattle fodder
Hmuipui/Lenhmui	Syzygium cumini	Wild	Abundant	Abundant	Wood is moderately hard, used for plywood, furniture, tool handles, panels, posts
•					and firewood etc
Hnahkhar	Mallotus paniculatus	Wild	Abundant	Abundant	Wood used for firewood
Hnahpawte	Litsea lancifolia	Wild	Abundant	Abundant	Wood used for firewood
Hnahthap	Colona floribunda	Wild	Abundant	Abundant	Wood is used for making lockets of key chain and firewood
Hnum	Engelhardtia spicata	Wild	Abundant	Abundant	Wood used for house construction, tea boxes, packing etc
Hriang	Betula alnoides	Wild	Abundant	Abundant	Wood used for furniture, plywood, tool hanldles.
Kawihthuang	Leucosceptrum canum	Wild	Abundant	Abundant	Wood can be used as firewood
Kei te	Symplocos racemosa	Wild	Abundant	Abundant	Wood is used for firewood.
Kharduap	Macaranga indica	Wild	Abundant	Abundant	Wood can be used for firewood etc
Khawkherh	Juglans regia	Wild	Abundant	Abundant	Wood used for cabinet making, furniture, carving etc
Khawreng	Streblus indicus	Wild	Abundant	Abundant	Heartwood is used for house posts
Khiang	Schima wallichii	Wild	Abundant	Abundant	Wood durable is used in planking, building, plywood, firewood
Khiangzo	Schima khasiana	Wild	Abundant	Abundant	Wood used for house building, firewood etc
Khuangthli	Bischofia javanica	Wild	Abundant	Abundant	Wood used for house building, furniture, firewood etc
Muk	Cordia fragrantissima	Wild	Abundant	Abundant	Wood durable, used for gunstocks, posts and firewood etc
Nganbawm	Acrocarpus fraxinifolius	Wild	Abundant	Abundant	Wood used for furniture, motor bodies, planking, flooring etc
Ngiau	Michelia champaca	Wild	Abundant	Abundant	Wood hard and durable used in furniture, building, planking
Pang	Bombax insigne	Wild	Abundant	Abundant	Wood used for packing cases, matchboxes, splints
Pangkai	Baccaurea ramiflora	Wild	Abundant	Abundant	-
Phuanberh	Macropanax undulatus	Wild	Abundant	Abundant	Wood is soft and can be used for firewood
Phuanberhpui	Ailanthus integrifolia spp	Wild	Abundant	Abundant	Wood used for partition wall, plywood, packing cases etc
Ramlakhuih	Pandanus odorifer	Wild	Abundant	Abundant	Fruit is used for combing cotton yarn and seeds are edible
Sihneh	Eurya japonica	Wild	Abundant	Abundant	-
Tatkawng	Artocarpus chama	Wild	Abundant	Abundant	Wood durable used for building, furniture, plywood etc
Tei	Toona cilliata	Wild	Abundant	Abundant	wood usedfor furniture, house building, ceiling, floors etc
Theipalingkawh	Bruinsmia polysperma	Wild	Abundant	Abundant	Sawn timber used for house construction
Theipui	Ficus semicoradata	Wild	Abundant	Abundant	Wood used for mortars, firewood etc
Thil	Lithocarpus polystachyus	Wild	Abundant	Abundant	Wood used for building, firewood etc
Thingdawl	Tetrameles nudiflora	Wild	Insufficient	Insufficient	Wood is used for flooring, walling, matches, plywood etc.

Thingsia	Castanopsis tribuloides	Wild	Abundant	Abundant	Wood used for house posts, firewood, charcoal etc
Thingtheihmu	Morus alba	Wild	Abundant	Abundant	Wood used for house construction, furniture, tool handles etc
Thlanvawng	Gmelina arborea	Wild	Abundant	Abundant	Wood used for planking, furniture, house posts etc
Vaiza	Hibiscus macrophyllus	Wild	Abundant	Abundant	Wood soft but durable used for posts, rafters etc
Vang	Albizia chinensis	Wild	Abundant	Abundant	Wood used for making drum, firewood and charcoal etc
Vaube	Bauhinia variegata	Wild	Abundant	Abundant	Wood is used for tool handles, firewood, charcoal etc. leaves are a good fodder.
					Decoction of bark/leaves is used in menstrual disorders, piles, diabetes, diarrhoea and
					dysentery
Vawmbal	Drimycarpus racemosus	Wild	Abundant	Abundant	Wood is used for building, boats, firewood etc
Vawngdawl	-	Wild	Abundant	Abundant	-
Vawngthir	-	Wild	Abundant	Abundant	-
Vawngthla	Premna milleflora	Wild	Abundant	Abundant	Wood durable used for house posts etc
Zairum	Anogeissus acuminata	Wild	Abundant	Abundant	Wood used for house posts, tool handles, fuel and charcoal etc
Zihnghal	Stereospermum chelonoides	Wild	Abundant	Abundant	Wood used for house construction, cabinet making, furniture
Zuang	Duabanga grandiflora	Wild	Abundant	Abundant	Wood used for building, plywood, firewood etc

	Wood pole is used for fencing post.	Mizo
-	Ripe fruit is eaten by birds and animals	Mizo
Bark and aerial roots are used for making coarse ropes	Leaves are good for cattle fodder	Mizo
-	Leaves are good for fodder, it is a fast growing tree	Mizo
-	-	Mizo
Tender pods are edible, seeds edible roasted or boiling, bark and leaves are also used in medicine	It is a fast growing tree and cultivated as ornamental and hedge plant	Mizo
Leaves and twigs are lopped for cattle fodder	Bark, fruit and leaves are used in medicine	Mizo
-	Fruits are eaten by man, bears and birds	Mizo
Seed is very useful for treating diabetes and the bark for fever, jaundice, urinary problems, sore throat, ronchitis, asthma, ulcers and chronic dysentery etc	Fruits are eaten by man, birds and wild animals	Mizo
-	-	Mizo
Root is medicinal for diarrhoea	-	Mizo
-	-	Mizo
Bark is medicinal and also used for poisoning fish. Leaves are lopped for fodder	It is a light demander	Mizo
-	The plant is said to be used as snake bite remedy. It can tolerate	Mizo
	moderate shade and it is a moderate shade growing tree	
-	-	Mizo
Bark is used in medicine and the leaves and bark are used in dyeing.	-	Mizo
Different parts of the plant are used in various traditional medicine	-	Mizo
Rind of the unripe fruit and young leaves are used to intoxicate fish and nuts for	Leaves are used for cattle fodder, it is a light demander and moderate fats	Mizo
tanning and dyeing	growing tree	
Tree is tapped for wood oil and oleo resin is applied to ring worm, ulcers, sprains etc . Bark is also chewed to relieve toothache	It is a light demander, can tolerate shade in youth	Mizo

Powdered fruit is used in scorpion sting, bites of centipede, juice of the bark for chronic ulcer and fresh cuts. Leaves are lopped for fodder	Tender leaves are cooked eaten. It is moderate light demander and moderately fast growing tree	Mizo
Pounded bark is used for poisoning of fish	inoderately last growing tree	Mizo
Juice of young leaves is used for curing tonsillitis and sores	Bark, stem and leaves are also medicinal. Leaves are lopped for cattle fodder	Mizo
Bark is used for constipation and leaves for toothache	-	Mizo
Leaves are lopped for cattle fodder	This tree is a quick growing and moderate light demander	Mizo
-	-	Mizo
Leaves are lopped for cattle fodder	-	Mizo
Leaves are lopped for cattle fodder	-	Mizo
Tender leaves are cooked and eaten without its water as vegetables	Leaves are lopped for cattle fodder	Mizo
-	-	Mizo
Fibre obtained from the leaves is used for nets, sacks and brushes. Decoction of the roots is also used in diseases of kidney etc.	-	Mizo
		Mizo
Bark is used in diarrhoea, milky juice is applied on inflammatory diseases of glands and sometimes used as milk in tea. Leaves are lopped for cattle fodder	It is a shade bearer in youth and grow very fast	Mizo
Bark is useful in fever, diarrhoea, itching and flowers in menstrual disorders	Leaves are lopped for cattle fodder	Mizo
Juice of fruits and leaves are applied on sharp pain caused by nettles or poisonous hairs of caterpillars	It is a fast growing tree	Mizo
-	-	Mizo
-	-	Mizo
Leaves are used as soap for washing 'Mizo Pawnpui' (Blanket)	It is a fast growing, good coppice and facvoured for birds nesting. Bark can be used for poisoning fish, juice of crushed bark and leaves are used to tick bite.	Mizo
Juice of the stem is recommended for mouth infection in children		Mizo
Silkworm fed on its leaves. Leaves are sometimes boiled with meats and eaten as curry. Root bark, leaves and fruits are also medicinal.	Young leaves and twigs are good for cattle fodder	Mizo
Flowers are eaten cooked as vegetables, leaves are lopped for cattle fodder	It is a light demander and fire resistant, fast growing tree	Mizo
Bark fibre which is called <i>Hruikhau</i> is used for making into rope and <i>Hnam hrui</i> . Leaves are used for fermenting cooked soyabean (<i>bekang</i>) and sometimes for wrapping food in.		Mizo
Bark used to poison fish. Leaves are lopped for cattle fodder	It is a moderate light demander and fast growing tree	Mizo
Leaves, tender fruits and flower buds are eaten as vegetable	It is a moderate light demander and wind firm tree	Mizo
Thick paste of the plant is applied on broken bone. Juice of the plant is also applied on sore of baby's navel	Plant is laxative and cooling used for cold, sinusitis and menstruation problems	Mizo
-	-	Mizo
Decoction of bark is used in stomach troubles, fever, diarrhoea and also apllied on measles, chickem pox, sprains and burns. Leaves are cooked in water and water is taken as a remedy for high blood pressure.	-	Mizo
Tender leaves are boiled with meats and eaten as vegetables		Mizo
Decoction of the bark is used in stomach troubles, fever, diarrhea and also applied on measles, chicken pox, sprains and burns.	Leaves are cooked in water and water is taken as a remedy for high blood pressure	Mizo

Root, leaves and flowers are also used medicinally. Bark and young leaves are		Mizo
used as a remedy for fever, stomach ache etc		
Bark is bruised, boiled with soil impregnated with urine to produce a bluish dye	Fast growing tree	Mizo

BIODIVERSITY OF HRIANGHMUN

Nicotiana tabacum

Caryota urens

Erythrina stricta (Red)

Artiodactyla suidae Bos gaurus

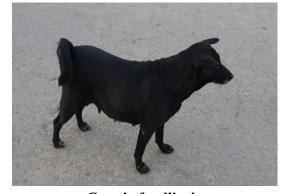

Gallus domesticus

Capra aegagrus hircus

Columba liva

Cannis familiaris

Felis catus

Sun drying of Turmeric

Sun drying of Rice grain

Sun drying of Gooseberries for preservation

Sun drying of Broomsticks

Preservation of Maize seeds

Hrianghmun Village

Members of Biodiversity Management Committee, Hrianghmun
